ExacqPacq16 - Service Pack for exacqVision Systems running Ubuntu 16.04.

Several changes and fixes to the exacqVision Ubuntu 16.04 image have been rolled into a single installer - ExacqPacq16.

Information regarding the changes and the version that were included are available below. You can check the current Image version and what exacqpacq16 versions (if any) on your Linux machine by running the following in terminal:

head /Release_Notes.txt

head /Release-Notes_ExacqPacq16.txt

To install on an existing system, use the following steps:

1. Access the hidden downloads page at https://exacq.com/files

2. Download 'exacqpacq16' under 'Ubuntu Service Pack > 16.04"

3. On the exacqVision Server, login to the admin Desktop.

4. Copy the 'exacqpacq16' file to the Desktop.

5. Run the following 3 commands in a terminal:

cd /home/admin/Desktop

sudo chmod 775 exacqpacq16

sudo ./exacqpacq16

6. Reboot
