b. Unselect both options below:

Microsoft Security Essentials

 Optimize security

 In order to optimize your computer protection, you should use a firewall. If you do not have a firewall turned on, Security Essentials can turn on Windows Firewall during this installation.

 If no firewall is turned on, turn on Windows Firewall (Recommended)

 This software contains functionality that may identify certain files as suspicious. If you choose, files or information about them may be automatically sent to Microsoft for further analysis. Microsoft uses these files and information to identify new malware and improve protection.
