

Can exacqVision Hybrid Systems use MPEG-4 Simple Profile?

Yes. eDVR systems use MPEG-4 Advanced Simple Profile by default, and sDVR systems use H.264 by default. To configure the system, complete the following steps for your system type.

eDVR Systems

1. Stop the exacqVision Server in Service Control Manager or by running **sudo /etc/init.d/edvrserver stop**.
2. Open c:\windows\XDVAPI.ini in Notepad or run **sudo nano /usr/local/xdvapi/etc/XDVAPI.ini**.
3. Add **MPEG = 0x2C00** in the [config] section. The default value, if missing, is 0x0C00.
4. Save and exit.
5. Restart the exacqVision Server.

sDVR Systems

1. Stop the exacqVision Server in Service Control Manager or by running **sudo /etc/init.d/edvrserver stop**.
2. Open c:\windows\stretch.conf in Notepad or run **sudo nano /etc/stretch.conf**.
3. Find the board in your system and add **MPEG4="1"** to the XML element. The default value, if missing, is 0.
4. Save and exit.
5. Restart the exacqVision Server.
