

Cloudvue

Intelligent Cloud Video Surveillance and Cloud Access Control Solutions

Thousands of businesses and organizations trust Cloudvue to simplify surveillance, streamline access control, and provide powerful intelligence that improves security operations and helps with organizational efficiency.

See what customers are saying:

"In terms of cost-effectiveness, ease of use, and reliability on our low-bandwidth networks, Cloudvue's surveillance solutions are above and beyond anything else on the market. The system is intuitive, easy to navigate, and allows us quickly login and manage HD surveillance from all our commercial properties on one screen. I would recommend Cloudvue to anyone who needs surveillance for multiple, large-scale commercial properties."

— Duane Dietz, Metro Fright Liner

Physical Security in the Cloud

Today's physical security solutions live in the cloud and they bring all the typical benefits associated with any digital transformation—centralized management, scalable solutions, access to tools that require powerful processing, and reduction in costs.

- **Centralized Management:** Control cameras, doors, alerts and permissions across all your buildings from one browser or mobile device, around the world.
- **Faster Intelligence:** With the Cloudvue, sharing information has never been faster. This increase in speed and accessibility transforms video surveillance footage from forensic data into actionable information that can be quickly distributed across entire organizations.
- **Scalable Operations:** An unlimited number of cameras and access control points can be added to a single instance. Custom floor plan views, map views, and powerful dashboards help keep data organized for one or thousands of locations.
- **Streamlined Costs:** Organizations typically see a reduction in the total cost of security by 20% to 30% by moving expensive on premises security infrastructure to the cloud
- **Use Your Existing Cameras:** Cloudvue Gateways can connect almost every camera on the market today. Use your current cameras or buy the brands you like the most and have them all connected under one centrally managed platform.

Clouvue

Add New Cloud Cameras

Simple to install and easy to use, Illustra Cloud Cameras enable a complete camera-to-cloud architecture, with all data secured from capture through transport and storage in the cloud.

3MP Flex Compact Mini-Dome

- Crisp and clear high-definition video
- Exceptional video quality and low-light performance

3MP & 8MP Flex IR Mini-Dome

- High number of pixels/ft improves image detail in wide areas
- Built-in IR illuminators produce clear images at an effective distance in varied low-light conditions

3MP Flex IR Bullet

- A true Day/Night network camera that provides 3MP full HD resolution
- The P-Iris feature delivers clear video in changing lighting conditions

8MP Flex IR Mini-Dome

- High-image-quality, feature-rich surveillance for a wide range of indoor and outdoor applications
- High number of pixels/ft improves image detail in wide areas,

2MP IR Outdoor PTZ 30x Optical 12x Digital

- Features true Day/Night functionality and Wide Dynamic Range (WDR)
- Bubble-free design eliminates reflections and maximizes image quality, regardless of the camera tilt angle

Connect Your Existing Cameras

You can move any existing camera as well as most ONVIF-compliant cameras from leading manufacturers to the cloud with Cloud Gateways.

K-Series Compact Fan-less

- 1 to 16 cameras
- Up to 80-day internal storage

X-Series Rugged 4G Cellular

- 1 to 2 cameras
- Up to 24-day internal storage

T-Series

- 1 to 24 cameras, up to 960-day internal storage

P-Series

- 1 to 32 cameras, up to 1600-day internal storage

S-Series

- 1 to 40 cameras, up to 1600-day internal storage

2U rack RAID5

- 1 to 100 cameras
- Up to 4800-day internal storage

Illustra cloud cameras and cloud gateways proudly use Western Digital Purple microSD cards for uncompromising video storage.
