Firefox will not run on Linux-based exacqVision Server

If you cannot run Mozilla Firefox on a new Linux server, remove the .mozilla directory from the Admin account home folder. To do this, complete the following steps:

1. Log in to Ubuntu as an admin.
2. Open a Terminal window (Start > Accessories > Terminal).
3. Type **sudo rm -rf ~/.mozilla**.
4. Enter the password for the admin account.
5. Run Firefox.
