Motion Frames Out of Order on Bosch Cameras

If you see motion images from a Bosch camera that appear to be out of order, the issue can often be resolved by selecting a different setting for the camera's GOP Structure. To change the setting, complete the following steps:

- 1. Open the camera's web configuration page by entering it's IP address in an Internet browser.
- 2. Open the Settings page and select Advanced Mode in the menu on the left.
- 3. Select the Cameras entry and then Encoder Profile.
- 4. Click the Expert Settings button to reveal additional options, including GOP Structure.

LIVEPAGE | + SETTINGS

- 5. Make sure IP (which stands for I Frames, B Frames, and P Frames) is selected in the GOP Structure drop-down list.
- 6. Click Set to enable the selected settings.
