

Grow Your Business With Tyco Cloud

The Ideal security platform for your budding cannabis business

Thanks to increasing legalization, medical use, and even recreational applications, the legal cannabis industry is growing at an exponential rate. Expected to reach \$73.6 billion by 2027*, this is certainly a hot business to be in. But it also has a lot of demands, particularly when it comes to compliance and security.

What are the most common challenges facing cannabis cultivators.

Challenge #1: Inadequate security. Camera systems or alarms that only cover a portion of the building or operation can leave the business exposed to theft.

Challenge #2: Missing or weak employee protocols. This can include a failure to check employees and their bags as they enter and exit the facility or worksite.

Challenge #3: Noncompliance with state or insurance requirements. This includes failure to properly store video footage or secure product at the close of each business day.

An inadequate video surveillance system or the improper access control solution can increase the risk of noncompliance to the strict regulatory requirements.

Here's how to mitigate these risks.

* Grand View Research, Inc. Report, February 2020

The answer is Tyco Cloud - comprehensive, scalable, and secure

Video Surveillance

Uninterrupted 24/7 video recording in all weather conditions

Connect thousands of cameras in multiple locations

Share surveillance data with trusted third-parties

Search through video from up to 100 cameras at the same time in 60 seconds for fast incident retrieval

Access Control

Key-less entry - no risk of passing key fobs to unauthorized intruders.

View live door activity and surveillance video from any access point, on one simple interface

Quickly and securely assign and revoke credentials to the user's smartphone

Video Storage

Cold Storage allows you to store months or years of video data in the cloud, to meet any compliance requirements at 1/3 the cost of regular storage

Download and safely save any length clip with Clip Storage for investigative purposes or for law enforcement

Compliance with cost effective long-term video storage up to 5 years
