Viewing the exacqVision Help File on a Mac System

The exacqVision Help file cannot be viewed directly throught exacqVision Client on Mac-based systems. To view the Help file, complete the following steps:

1. In exacqVision Client, click the Help button (the circle with the blue question mark).

2. Follow the onscreen instructions to download and install Chamonix CHM viewer.

3. On the Desktop, right-click the exacqVision Client shortcut and select Show Package Contents.

4. Expand the Contents folder to display either MacOS or MacOSX.

5. Expand the MacOS or MacOSX folder to display exacqVision.chm.

6. Copy exacqVision.chm to the desktop.

7. Open exacqVision.chm using Chamonix. The table of contents should be displayed at the right side; if not, click the Show/Hide Drawer button.
