

# exacqVision Cloud Drive

Subscription-based cloud video storage

## The Advantages of Cloud Storage

Cloud storage provides significant advantages for customers looking to securely store critical assets online so that they can access them from any location. For the end customer, the chief advantages of cloud solutions are in reduced capital expenses, faster deployments, increased responsiveness, and subscription-based pricing models that allow easier budgeting. For integrators, it provides a recurring revenue stream in a rapidly growing market.

## Search Video in the Cloud

exacqVision Professional and Enterprise customers can now archive event video and bookmarks to the cloud, and retrieve them from any device with an Internet connection. Video is seamlessly accessible through the exacqVision Client or via Exacq Mobile for iOS and Android operating systems.

## Allocate Cloud Storage Across Cameras on an NVR

Purchase a subscription by the number of days you wish to retain video and configure one or more cameras on an NVR to send event video to the cloud. Unlike some cloud video providers, Exacq doesn't restrict subscriptions to individual cameras. exacqVision Professional and Enterprise customers can easily purchase subscriptions through channel distribution partners.

## Safeguard Against Disaster

Augment local storage solutions with cloud storage, or create an off-site copy of critical video to ensure it is protected against natural disasters, theft and other site-specific events.

## Protection Against Cyber Attacks

exacqVision Cloud Drive is resilient against cyber attacks as video is always encrypted for both transmission and storage in the cloud. Users are validated with email verification, ensuring that only authorized personnel can access video stored there, according to role-based permissions. Password policies are strictly enforced to restrict credentials to complex, non-default passwords. SSL pinning and trusted certificates guard against man-in-the-middle attacks and impersonation. The solution also benefits from the Microsoft Azure cloud infrastructure which provides additional layers of cyber defense.

The exacqVision Cloud Drive adheres to the rigorous standards of the Johnson Controls' Product Security Program. The holistic approach to cyber protection is aimed at providing peace of mind to our customers. Our security mindset begins at initial design concept and is supported through deployment, including a rapid incident response to meet the comprehensive and evolving cybersecurity environments.
